

# Clinical Flow Analysis and Reporting

**FCS Express Flow Clinical Edition is the first 3rd party flow cytometry analysis software listed with the FDA.**

Top 10 →

**Reasons clinical labs depend upon FCS Express for analyzing and reporting their results**

- 1 Your analysis is the final report. Design your customized report and watch it update automatically as your analysis changes.
- 2 A modern MS Office™ style interface allows you to work in a familiar and creative environment.
- 3 Automatically display sample keywords, including patient demographics, to eliminate clerical errors.
- 4 Incorporate your own dynamic statistics, equations, and canned comments to personalize your reports that update in real time.
- 5 Undo and Redo actions help avoid mistakes.
- 6 Embed QC alerts directly in the analysis template. Color coded warnings are easily noticed by the analyst.
- 7 Pages for Add-ons can be hidden and only appear when needed allowing you to keep a whole case together.
- 8 Export your report in many formats: Excel™, PDF™, PowerPoint™, text files, JPEG and more...
- 9 Add LIS integration and Publishing for virtual or Tech Only flow.
- 10 Support your 21 CFR Part 11 Compliance program with audit trails, security and electronic signatures.

**Make saving time and increasing efficiency YOUR REASON to use FCS Express**
